Forecast for Friday 28 Jun 2024

Weather: A cloudy start to the day across the park, with a risk of isolated showers, especially in the north and west. Sunny spells and dry conditions begin to develop in the afternoon with the best of the breaks in the south and east.

Chance of cloud-free hill tops above 800m: 40% in the morning becoming 90% by the afternoon.

Low Cloud and visibility: Broken cloud during the morning obscuring hill tops above 500-600m, by the afternoon cloud begins to break up and the bases lift, grazing the highest summits. Moderate visibility at first, poor or very poor in cloud or showers, improving to good or very good by the afternoon.

Meteorologist’s View

Windy conditions will make for fairly arduous walking on exposed terrain with buffeting of clothing. Balance may be affected at times. Any early morning walks are likely to see rather cool on the highest summits and while often cloudy, UV levels are still expected to remain high and protection is advised.

Forecast for Saturday 29 Jun 2024

Weather: A dull day with low cloud covering modest hill combined with rain and drizzle affecting the park through much of the day. The best of any drier spells in the east of the park.

Maximum wind: Southwesterly 10-15mph gusting 20-25mph.

Chance of cloud-free hill tops above 800m: 20%.

Low Cloud and visibility: Extensive cloud covering hills over 500-600m with patchy cloud down to 300m at times in any prolonged bursts of precipitation. Moderate to poor visibility for the most part, very poor in drizzle and low cloud.

Temperature: **Valleys:** Plus 14 Celsius becoming Plus 16 Celsius.
At 800m: Plus 6 Celsius becoming Plus 8 Celsius.
Freezing level: Above summits.
